

DUBLIN MAKES ME

**DUBLIN MADE ME AND NO LITTLE TOWN
WITH THE COUNTRY CLOSING IN ON ITS STREETS
THE CATTLE WALKING PROUDLY ON ITS PAVEMENTS
THE JOBBERS, THE GOMBEENMEN AND THE CHEATS**

**DEVOURING THE FAIR-DAY BETWEEN THEM
A PUBLIC-HOUSE TO HALF A HUNDRED MEN
AND THE TEACHER, THE SOLICITOR AND THE BANK-CLERK
IN THE HOTEL BAR DRINKING FOR TEN.**

**DUBLIN MADE ME, NOT THE SECRET POTEEN STILL
THE RAW AND HUNGRY HILLS OF THE WEST
THE LEAN ROAD FLUNG OVER PROFITLESS BOG
WHERE ONLY A SNIPE COULD NEST**

**WHERE THE SEA TAKES ITS TITHE OF EVERY BOAT.
BAWNEEN AND CURRACH HAVE NO ALLEGIANCE OF MINE,
NOR THE CUTE SELF-DECEIVING TALKERS OF THE SOUTH
WHO LOOK TO THE EAST FOR A SIGN.**

**THE SOFT AND DREARY MIDLANDS WITH THEIR TAME CANALS
WALLOW BETWEEN SEA AND SEA, REMOTE FROM ADVENTURE
AND NORTHWARD A FAR AND FORTIFIED PROVINCE
CROUCHES UNDER THE LASH OF ARID CENSURE.**

**I DISCLAIM ALL FERTILE MEADOWS, ALL TILLED LAND
THE EVIL THAT GROWS FROM IT AND THE GOOD,
BUT THE DUBLIN OF OLD STATUTES, THIS ARROGANT CITY
STIRS PROUDLY AND SECRETLY IN MY BLOOD.**

HOWRYA!

Dublin is one of the world's most loved capital cities. Full of young people, music, bicycles, startups, and global tech companies, inspiration and fun are easy to come by here.

Within these pages is Dublin's poetry, history, tech champions and talent opportunities, and a map of some of the highlights of our fair city. Come see us in Dublin and we'll introduce you to global innovation done the Irish way, and an ecosystem that's built to accelerate companies into the US and globally.

Everybody loves Dublin and we're here to show you why. Connect with us @TechinDub or email Sarah Leahy, our Tech Concierge at sarah@startupdublin.com. We look forward to welcoming you.

HOME GROWN HEROES

Dublin has grown into a hotbed of innovation over the last decade. From medicine to music and semiconductors to security, Irish entrepreneurs have built a broad spectrum of businesses that explore new ideas, disrupt stagnant industries and deliver real value. We're world leaders in Enterprise SaaS, TravelTech and financial payments technologies. In the last six months, €344M has been invested in Irish companies, with a total of €1.5B in investment over the last three years. The ideas are here, the talent is here and the investment is here. Dublin is open for business—come join us.

Founded in 2012, the company was initially funded by its founders with additional seed capital from Tribal Ventures, Frontline Ventures, and Enterprise Ireland. Hundreds of publishers now use PageFair to measure the cost of adblocking and to display alternative non-intrusive advertising to adblockers.	www.pagefair.com	1.24M
Barricade Security Systems	Barricade works like an early warning system against any attempts at breaching the security of your servers.	Barricade's platform marries traditional intrusion detection methods and innovative machine learning techniques to identify data breaches, attack patterns and operations anomalies, all of which are made to detect malicious intent and let you know about it.	www.barricade.io	1.2M
Aylien	AYLIEN is an AI, NLP & Machine Learning startup based in Dublin, Ireland.	At AYLIEN, we love the Web, but we also recognize its flaws, which is why we spend our days reimagining the way we interact with the Web. We're building a Web that's more agile, more useful, and, above all, more intelligent. From our headquarters in Dublin, we spend our nights dreaming, and our days turning those dreams into reality.	www.aylien.com	1.14
Xpreso	Xpreso's goal is to eliminate the "Sorry We Missed You" card that online buyers receive due to failed delivery attempts.	Xpreso is starting a parcel delivery revolution! Our goal is to eliminate the "Sorry We Missed You" card that online buyers receive due to failed delivery attempts. We are fully funded, winners of the NDRC Launchpad 8 programme, and one of eight companies in Europe selected by MasterCard® for their Start Path partnership programme. Our clients include Ireland's largest delivery company - but as we grow internationally this is only the start - we are changing the world of ecommerce delivery!	web.xpreso.com	1.12

WHY DUBLIN?

EAMON LEONARD TRACING THE ROOTS OF DUBLIN TECH

Eamon Leonard is a founder, an advisor to startups, an angel investor, and a tech community organiser. He sold his company, Orchestra (a Platform-as-a-Service), to Engine Yard Inc. in 2011. There, he held the roles of VP Engineering and VP Developer Relations until August 2014. Now independent once more, he is currently developing a number of new projects, amongst them a distillery.

When you look at Dublin today as a place for entrepreneurs, particularly for startups, what do you see out there?

There wasn't really a day one. In my view, whatever ecosystem we have right now in Dublin has its roots going back to IBM, Microsoft and Apple all having a footprint in Ireland. I would even say academia in Trinity, UCD, DCU, and the

other universities around Ireland where computer science departments were chipping away for years at research and development. They all have had a role to play in the foundation of what exists now. I should mention from the outset that this is all based solely on my recollection of the time, and not necessarily an entirely accurate account – I'm sure there are people I'm not mentioning. This is just from my perspective.

And where did it begin for you? You had done a computer science degree, is that right?

Not even... I don't have any qualifications. I have my Leaving Cert, and even then I had to repeat that. But you know, there's different types of intelligence out there. I started working for myself in 2007, though I was a part of the tech industry in Ireland going back to the nineties. The real catalyst, I think, was the emergence of blogging platforms and Twitter. There were a lot of people here in the early 2000s, designers and developers, that would use blogs as a creative outlet, an outlet to communicate their intent, their ideas, educate other people, share their thoughts and opinions – and there was a lot of opinions. So a nascent community started to be formed around these blogs.

What years are we talking about here?

2003 to 2006. The emergence of Firefox as a browser started to spark the imagination of developers and designers around the world, and Ireland was no different. Anybody could create content, upload content, and you didn't need millions of dollars to do it. The people who were the early adopters of these technologies would go on to be the new shoots of hope for a future tech industry in Ireland. Nobody realised that at the time. They were just doing what they were doing.

How many people were involved in that era?

It was small enough so everybody knew each other. If not in person, then certainly by name and reputation. And then the conversation shifted from being kind of fragmented across blogs to more singular conversations in one place – that being Twitter. I could be wrong but I think we were one of the first places in the world to have a Tweet-up.

Who was involved back then and what were they doing?

I remember there was a guy called Marcus Mac Innes. Marcus has since left tech, and he's working in a bricks and mortar business, he has a shop called Industry on Drury Street. It's wonderful. Top guy, one of my favourite people in Dublin. I still see him a lot. Marcus had essentially created the Irish Flickr, I guess—a photo-sharing website, for the photography community called pix.ie. He had some funding for it, and I remember being seriously impressed that I knew somebody that had actually been funded. I had just started off as a developer and hadn't a fuckin' clue how to sell my skills or my talent. So meeting somebody who was a bit older and was a programmer but also was able to speak a bit of business and had been able to raise some funds, I was like, "This is great to be around somebody like this..."

Who else was there back then?

Eoghan McCabe and Paul Campbell and myself, we pooled our resources and found this shitty little office just off Bachelors' Walk. We loved it. We had our own little tiny space and we were all freelancers. Paul is the founder of Tito, he was a freelancer and developer back then. Eoghan is now the CEO of Intercom. These two were twenty-three at the time. I was a jaded thirty year old who had just come out of a long period of nothing really happening in web. And hanging out with these two young fellas really just lit a fire under my ass. The energy they had, the flair

for entrepreneurship, resonated deeply—I learned more from those two guys, who I'm proud to call some of my best friends, than I had in the previous decade of working in tech.

When you would talk to friends outside of this community about what you were doing...

What are you talking about? (laughs) I didn't have any friends outside of this community. My world was limited to Dublin back then. I didn't know anybody in tech outside of Ireland.

If I had met you back then and asked, "Okay, where do you want to go? And where do you want Dublin to go?" What would you have said?

I was somebody with lots of ideas and not enough manpower or capital to build those ideas. And Dublin was not a place to get the capital to do that. And I was jealous of the places that did.

What were the other kind of lines in the sand? The moments that got us from there to where we are now?

Web Summit is absolutely a part of the story, without a doubt. I was at one of the first ones in Trinity College. It was in one of the bigger lecture halls, I remember the place was so jammers, people were sitting on stairs and steps. And even then they had an overflow room, where they were trying to stream in video of the talks. Matt Mullenweg (founder of WordPress) and Craig Newmark (founder of Craigslist) spoke. I was looking around the room going – the same thing as the Future of Web Apps event a few years before – "This is really great to see all this. These are all people in our community and are in our industry but I never see any of these people at any of the events that are going on. Why aren't they more visible and active?" But still, it was good to see nonetheless.

WORKERS WANTED

FACEBOOK MOBILE OPERATOR SUPPORT ENGINEERING ANALYST

As a Mobile Operator Support Engineering Analyst you will be working closely with Mobile Operator Support Engineers, providing support to Facebook's mobile operator partners, helping them to ensure a high quality experience to their subscribers. You will also work with other engineering teams to optimise and improve existing processes, communicate with mobile operator partners constantly and evaluate possible improvements in the infrastructure deployments and processes. The role is based out of our Dublin office and works with a broad range of Mobile Operators across APAC, EMEA and LATAM, helping them to integrate affordable basic Internet services including Facebook into their mobile offerings.

<http://bit.ly/294Z77W>

NEWSWHIP BUSINESS DEVELOPMENT REPRESENTATIVE, DUBLIN

NewsWhip is looking for a Business Development Representative to join our Dublin based team. As a BDR you'll be looking to find out engage "good fit" companies through strategic prospecting. NewsWhip is the leading technology used for tracking what

matters in the world each day. Our technology mines signals from social networks that reveal the stories, events and people driving discussion and engagement.

<http://bit.ly/29oQ7WV>

REALEX TECHNICAL LEAD / SYSTEM ARCHITECT

At Realex you will build the technology that handles billions in payments each year. This is the core of our business. You'll lead the technical design of products that thousands of businesses depend on to accept payments online. In short, you'll own a key part of our future... and get to make cool stuff.

<https://goo.gl/tMYLao>

LINKED FINANCE WEB DEVELOPER

Linked Finance offers trustworthy small businesses a new viable alternative to borrowing from the banks. Real people can lend small amounts to great Irish businesses at very attractive interest rates. The banks get bypassed, the wheels keep turning and everyone wins! Working as part of the technology team, you will work on the product backlog for our core application, a cloud based marketplace built in PHP. Help maintain and add new features to the live marketplace which processes 2-3 nightly loan auctions, with hundreds of clients lending money. Help take this

platform to the next level by building out reusable APIs, and integrating our platform with third party APIs.

<http://bit.ly/294oR0b>

MASTERCARD AUTHENTICATION TECH CONSULTANT

As part of an exciting, fast paced environment developing authentication and security solutions in the mobile and e-commerce space, this position will provide technical expertise within the development lifecycle for new products and services. The person in question will specialize in biometric authentication. Flexible work arrangements will be in place where the successful candidate will be required to work from home per agreed number of hours/days.

<http://bit.ly/292D7F2>

AMAZON PRINCIPAL SOFTWARE DEVELOPMENT ENGINEER

Amazon's website hosting group is looking for a Principal Software Development Engineer to architect and technically lead the development of Amazon's next generation website hosting technologies used to monitor and manage the operations of our highly distributed website and service fleets worldwide that serve 10s of billions of customer requests per

day through Amazon retail websites, Kindle, Amazon instant video, Amazon subsidiaries and more.

<http://bit.ly/29f17HJ>

SLACK ENTERPRISE ACCOUNT EXECUTIVE

We are searching for an exceptional enterprise sales person to focus on our largest customers and opportunities. The successful candidate will understand their customers' business objectives and act as their trusted advisor for using Slack most effectively. They will gather customer feedback and requests while working with internal teams to help align our product roadmap. This role needs to communicate effectively across multiple departments and customers, have the ability to shift gears at a moment's notice, and enjoys the challenges of providing excellent customer service in a fast paced environment.

<http://bit.ly/294p8AX>

CURRENCYFAIR HEAD OF PARTNERSHIPS

The new Head of Partnerships, you will guide the vision, planning and development of all of CurrencyFair's future partnership opportunities together with the CMO to help support the delivery of our overall company

strategy. Reporting to the CMO, you will collaborate with him to innovate new partnerships, identify leads and ensure the product and tech teams can bring support the opportunities. To be successful in this role, you will have proven track record of complex business development in an uncertain environment where not all parameters are set.

<http://bit.ly/295nsX1>

MAVEN46 WEB DEVELOPER

Want to be part an innovative and game changing fashion-tech start-up? We are an online interactive fashion, beauty and lifestyle shoppable magazine that curates data driven content for our style savvy audience. maven46 is looking for talent to grow with us. We are building our team of mavens to cater for our growing domestic and international audience. We are looking for a talented and creative web developer. Check out www.maven46.com or join our community on FB, follow us on twitter @maven46 or Instagram maven46mag for more.

<http://bit.ly/29f1h15>

INTERCOM DESIGN LEAD

We need to hire a Design Lead who can own design work across multiple Intercom products and manage the designers working on those teams. This will involve a combination of hands-on

strategic design work, guiding the work of other designers, and mentoring them as they grow. Intercom is a design-driven company. Two of our founders (our CEO and CSO) were designers. Our VP of Product was a designer. Most of our product managers were designers. You will report directly to our Director of Product Design. With a strong design culture and complete buy-in from the very beginning, this is a place where you will have the opportunity to do the very best work of your career.

<http://bit.ly/297R1Z0>

TWILIO TECHNICAL SUPPORT ENGINEER (GERMAN SPEAKING)

You will help customers understand the finer points of Twilio capabilities and influence them to implement best practices. You will interact, collaborate and network with other departments in Twilio in your search for solutions that our customers need. You will work cross functionally with Engineering, Product Management and Sales. Sometimes you will work with similar cross-functional teams from partner organizations.
